Pre-Return and Return-to-Campus Preparation and Communication Plan

The intent of this document is to assist collegiate athletic departments with preparation and implementation strategies to enhance a safe return to campus and athletic activity following the COVID-19 pandemic. Each institution should personalize the content of this plan to incorporate campus-specific policies and resources.

1. Preparation for Return to Campus

- A. Campus General Council/Risk Management Liability Understanding & Communication
- B. Creation of Athletics COVID-19 Action Team
- C. Creation of Action Plan
- D. Safe Transition to Athletic Activity

2. Staff Return

- A. Acquisition of Personal Protective Equipment
- B. Acquisition of Disinfectant Products
- C. Considerations of Pre-Participation Physicals
- **D.** Infectious Disease Prevention Plan
- E. Quarantine/Isolation
 Unit Plan
- F. EMS/911 Emergency

4. Return to Training

- **A.** Safe Transition to Athletic Activity
- B. Equipment Sanitation
- C. Spacing Considerations
- D. Team Ops & Travel
- Considerations
- E. Event Planning &
 - Management

3. Student Athlete Return

- A. Infectious Disease Prevention Education
- B. Infectious Disease Cluster Response Plan
- C. Quarantine/Isolation Unit Plan
- D. Pre-Activity Screenings
- E. Preparations for Implementing Safe
 Training Approach

5. Return to Competition

Pre-Return and Return-to-Campus Preparation and Communication Plan

The intent of this document is to assist collegiate athletic departments with preparation and implementation strategies to enhance a safe return to campus and athletic activity following the COVID-19 pandemic. Each institution should personalize the content of this plan to incorporate campus-specific policies and resources.

A. Campus General Council/Risk Management Liability Understanding & Communication

- 1. Align department policies with campus policies and communication of public healthcare guidelines
- 2. Reporting, monitoring and resolution of symptoms of illness should align with institutional guidelines
 - · Patient-health care provider contact
 - · Emphasis on avoiding communal buildings

3. Infectious disease education for student athletes and departmental staff

- · Guidelines for infection prevention and transmission control
- Proper communication methods for reporting symptoms
- · Individual personal conduct and hygiene

B. Creation of Athletics COVID-19 Action Team

1. Primary stakeholders/members

- · Athletic director or designee
- · Health care administrator
- · Sports medicine team
- · Strength and conditioning
- · Team physicians
- · Student health
- University crisis management/emergency preparedness
- Counselling
- Facilities

2. Potential advisory groups

- · Federal/state/local public health officials
- · Custodial/sanitation
- Compliance
- Coaching/sport operations
- Equipment
- · Housing, dining and nutrition
- · Student development
- Academics
- · Human resources
- Campus safety
- Athletic conference/governing bodies

Resources to consider

- CDC: Infection Prevention and Control Assessment Tool for Outpatient Settings (2016)
- BOC Facility Principles (2015)
- CDC Guideline for Isolation Precautions: Preventing Transmission of Infectious Agents in Healthcare Settings (2019)
- American College Health Association (ACHA) COVID-19 Resources
 - ACHA Guidelines: Student Health Considerations & Guidelines for Re-opening Higher Education Institutions
- EPA List N: Disinfectants for Use Against SARS-CoV-2 (2020)
- CDC: Guidance for the Selection and Use of Personal Protective Equipment in Healthcare Settings
- Interassociation Recommendations: Preventing Catastrophic Injury and Death (2019)
- CSCCa and NSCA Joint Consensus Guidelines for Transition Periods (2019)
- NCAA Core Principles of Resocialization of Sport
- Websites for local, county or regional board of health governing bodies responsible for administering and enforcing state public health laws and regulations

C. Creation of Action Plan (with consideration of the following items and in alignment with institution guidelines/action plans)

1. Guidelines and acquisition of personal protective equipment (PPE) for staff

- · Alignment with CDC and State/local guidelines on appropriate protection
 - · Evaluate PPE and equipment needs/availability/optimization
 - · Procurement of materials may dictate levels of service and operational capacity

2. Return-to-campus guidelines

- Alignment with public health agencies, governmental and institutional guidelines regarding travel and post-travel recommendations
- See recommendations from NATA: ICSM COVID-19 Screening Committee

3. Quarantine/isolation unit planning

- Alignment with public health agencies and institutional guidelines
- Considerations:
 - · On- and off-campus housing/dining
 - Documentation
 - · Contact and location tracing (HIPAA/FERPA)
 - Length of time away from individuals/facility
 - · Location
 - · Monitoring, follow up and serial exams
 - Discontinuation considerations
 - · Personal travel procedures
 - · Team travel procedures

4. Infectious disease cluster response plan

- Contact local and institutional health authorities
- Consideration of general epidemiological strategies, and best-practice recommendations
- · Re-evaluation of prior disinfectant/purification/equipment plan

5. COVID-19 prevention disinfectant/purification/equipment plan

- · Considerations:
 - · Procurement of materials may dictate levels of service and operational capacity
 - Proper products and application methods
 - · Locker rooms
 - · Weight room
 - Communal areas
 - Meeting rooms
 - · Health care facilities
 - Academic areas
 - · High touch surfaces
 - · Any shared health, fitness and sport equipment
 - Food service (communal meals and fueling stations)
 - Sanitary hydration
 - Laundry

6. EMS/911 emergency differentiation plan

- Adaptation of emergency action plans based on campus and local EMS/campus safety availability, facilities considerations, increased demands and increased risk of exposure at local emergency facilities
 - · Alternate hospitals and health care facilities
 - · Alternate transportation plans (triage, location, etc.)
 - · On-site availability of physicians
 - Capacity student health services

7. Social distancing considerations

- · Social distancing principles within:
 - · Team scheduling of shared facilities
 - · Health care facilities
 - · Locker rooms
 - Weight rooms
 - · Team meeting rooms
 - · Athletic academic areas
 - · High volume communal areas in athletic facilities

Athletic dining areas

· Recommendations to conduct virtual team activities when possible

8. Implementation of infectious disease prevention plan (shared responsibility)

- · Individual personal conduct
- Signage
- Hand sanitation stations
- · Annual prevention education and training
- Operational considerations

9. Pre-participation considerations

Physicals exams and screenings

 Contingency plan based on provider accessibility and institutional guidelines regarding physical exams

 Evaluation of additional screenings based on health history, as recommended by team physician/primary care physician

 New student athlete, returning student athlete and student athlete with verified (+) test for COVID-19

· Obtain recommendations from treating physician when possible

D. Safe Transition to Athletic Activity

 Adherence to governing body and consensus recommendations for transition and acclimation to activity following extended inactivity periods

2. Event planning and management considerations

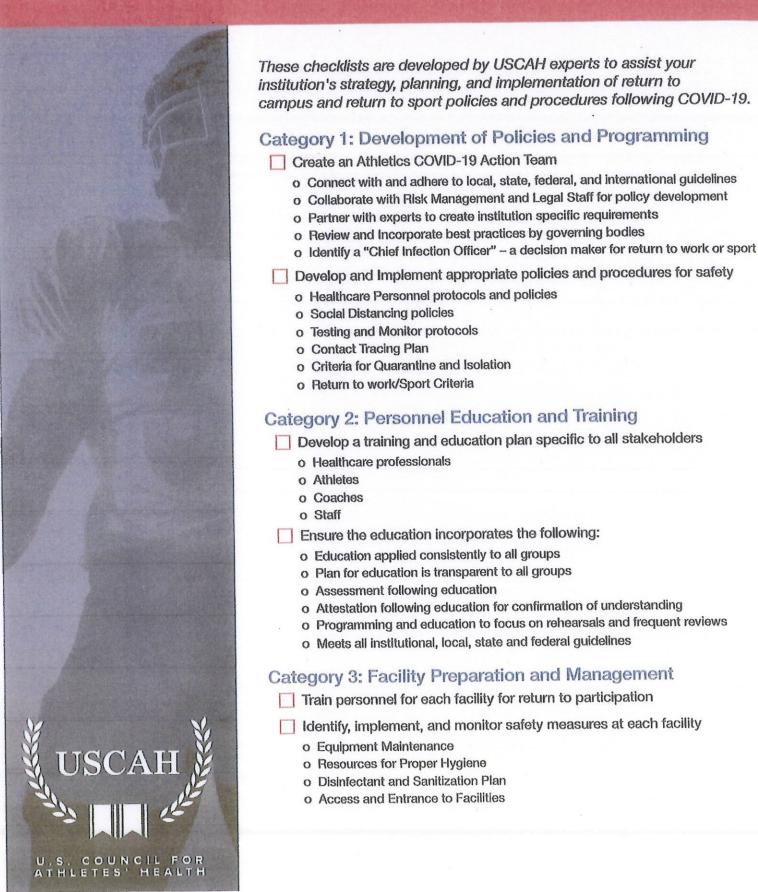

- · Game management personnel
- · Visiting team concerns
- Venues
- Spectators

3. Team operations and team travel considerations

E. Contingency Plan to Manage Recurrence

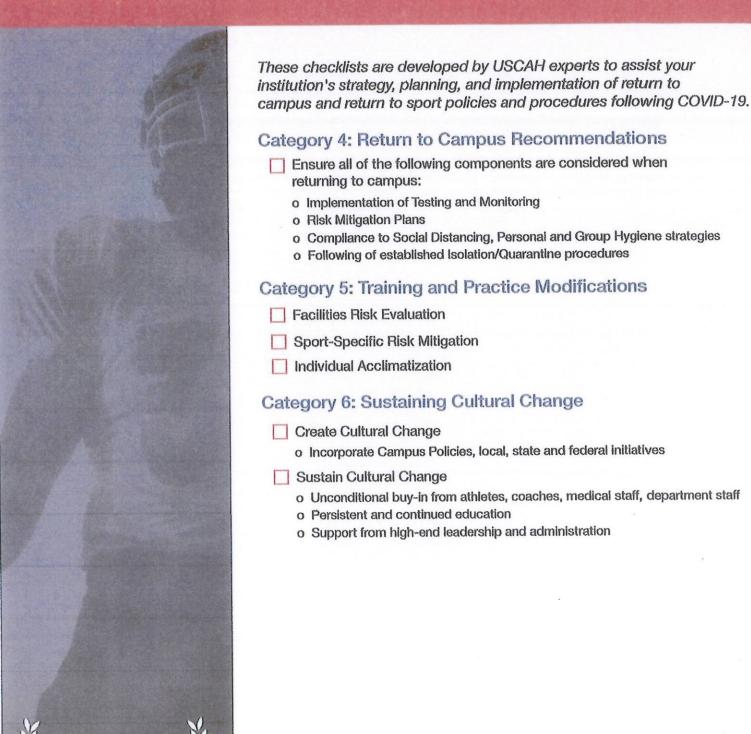

USCAH Checklist: A Framework for Return to Sport from COVID-19

For additional information and programming to ensure your institution is prepared for a return to eampus and a return to sport collaborate with USCAH. Contact USCAH at info@uscah.com or visit the website at uscah.com.

USCAH Checklist: A Framework for Return to Sport from COVID-19

NJCAA Council on Student-Athlete Welfare and Safety ("Council")

Return to Practice / Play ("Return to Play") Considerations for NJCAA College Athletics

Return to play for NJCAA college athletics should be based upon a phasic process with each phase subject to state, county and local guidance as well as CDC and other federal recommendations, and concurrent with individual campus-specific policies and procedures.

It is recommended that institutions create a COVID-19 Athletic return to play team to work in concert with that of their institutional re-entry team.

Before considering a return to play, and with the goal of protecting the health and safety of the studentathletes, coaches and staff, the NJCAA recommends that member institutions have policies/protocols in place, at minimum, in each of the areas outlined below.

It is important to note that the purpose of this document is to encourage institutions to thoroughly and carefully evaluate every aspect of their athletic operations in the context of their college, state, county and federal guidelines for a safe return to play for student-athletes, coaches, staff, and their college community. It is not meant to be prescriptive nor mandatory. This document is intended to assist colleges in thinking through the complexities of developing their college athletic COVID-19 plan, and their ability to execute the plan with the resources available to them, as they contemplate a return to play.

Every aspect of the athletic program space should be considered when developing this plan: meeting rooms, athletic training room, strength/conditioning facility, locker room, equipment room, area of play, equipment, transportation, all personnel, etc. Additionally, each of these plans should outline procedures during each phase of the re-entry of athletics at that particular institution.

- Social distancing. (Weight room, practice, locker-rooms, meeting rooms, sports medicine, administrative offices, traffic patterns moving through facilities, designated ingress/egress access points, etc.).
- Sanitation / disinfection. (Schedule for each area, type of cleaning supplies, budgeting and obtaining supplies, personnel responsible and their protection, type of sanitizer available for patrons of each facility and education on their disposal, etc.).
- 3. Symptom monitoring and documentation. (Ability to monitor symptoms through use of a daily questionnaire and/or temperature check, personnel responsible, logging of documentation, purchase of thermometers, procedures for protection of privacy. Develop partnership with local hospitals/clinics. Decisions on who is monitored, consideration of vulnerable persons, etc.).
- Symptom management and follow-up. (Protocol for following through on COVID-19 related symptoms, contact tracing system in place – department/college/state responsibility? Process for isolation, documentation required for return to facilities/play, communication system, etc.)
- 5. Safe return to play. (Protocols for progressive training to reduce injury potential for student-athletes out of athletics since March, process for those who have tested positive for COVID-19 or in close contact with someone who was positive, requirement for pre-participation exam, addition of a COVID-19 assessment to the PPE. Education for coaches on exercise adaptation, etc.).

- Infection prevention/control measures. (Provision of hand sanitizer. Development and delivery of
 education for student-athletes, coaches, staff. Messaging on hygiene, staying home if feeling sick.
 Communication with athletic department, requirement of face coverings who, when. Use of
 individual fluid containers. Laundry, sharing equipment, etc.).
- 7. Use, procurement, storage, distribution and disposal of PPE. (Who will use, when, type of equipment. Who will purchase/procure, budget involved, disposal procedures, etc.).
- 8. Criteria for participation in group sessions (once permitted). (Group sizes and interactions; considerations for vulnerable persons, use of COVID-19 assessment, face covering if required when, permitted and non-permitted activities, equipment use, etc.).
- 9. Contests. (Consider all involved: including visiting team party, officials, staff, fans. Social distancing, symptom checking, use of vulnerable individuals as staff / officials. Visiting team expectations / procedures, spacing on bench/sideline. Consider an assumption of risk waiver. Use of face coverings. Fans, if permitted spacing, capacity, use of bathrooms, concessions, movement patterns, congregating after game, meet and greet with players, families, etc.).
- 10. Transportation and travel. (Consider length of travel, vehicle capacity to permit for social distancing, budget impact if multiple vehicles are required, use of face coverings, accountability in maintaining distancing in vehicle, sanitation of vehicle, screening of travel party before boarding vehicle, expectations of drivers, etc.).

Resources

The following documents can be used as resources as colleges develop their athletic institutional plan for return-to play.

Return to Sports and Exercise during the COVID-19 Pandemic: Guidance for High School and Collegiate Athletic Programs. Korey Stringer Institute, University of Connecticut, Storrs, CT

Pre-Return and Return-to-Campus Preparation and Communication Plan. NATA Intercollegiate Council for Sports Medicine.

Return to Training Considerations Post-COVID-19. United States Olympic and Paralympic Committee.

NJCAA STUDENT ATHLETE COVID 19 DAILY SCREENING QUESTIONNAIRE

ATHLETE NAME			Student ID:
