SUGGESTED GUIDELINES FOR INTERSCHOLASTIC PARTICIPATION FOR NON-ENROLLED STUDENTS

(Modified with the permission of the Bellbrook-Sugarcreek School District, Mr. Tom Bean, Athletic Administrator)

This document shall serve as the OHSAA recommendation to school administrators as to what documents a school should keep on file for a student's participation under the Ohio Revised Code.

Recent changes in Ohio law may permit a participation opportunity for students not enrolled in the school that sponsors the sport. The OHSAA refers to these students as “**non-enrolled students**” due to their status of not being enrolled and attending the school where they may be eligible to participate. This provision is also codified in Bylaw 4-3-1 Exception six.

A student who attends a STEM, community or non-public school (both chartered and non-chartered) **IN OHIO** whose school does not offer the sport the student wishes to play, may have a participation opportunity at the public school in the parents' district of residence. That residential public school is the only choice for students in these three types of schools except for the non-public school student who has an additional choice of the public school located in the district where the non-public school is located, if different than the residential district.

In addition, state law permits home-educated students, that is, students who have been excused from compulsory attendance by the superintendent of the students' residential public school district, to have an opportunity to play sports at the residential public school. **For home-educated students only**, if the residential public school district does not offer the sport that the student wants to play, the student may seek an opportunity to participate at another public school subject to the sole discretion of that school district's superintendent.

The following are suggested guidelines to be completed and on file with the Athletic Administrator's Office at the high school or the Assistant Principal/Principal at the middle school PRIOR to permitting the student to try out for a team or engage in any interscholastic participation.

FOR HOME EDUCATED STUDENTS

1. State law requires that the Home Education Notification Form SHALL be on file with the Office of the Superintendent (local, city, exempted village or County ESC) for the District. On this form, it is important to note for each year of school, the grade level of the student for ascertaining semester eligibility. Please check with the district superintendent to ensure that this information is available and recorded on the eligibility certificate.

 - a. Utility bill showing name and address
