

1/8

Summer 2026

Dear Parents and Guardians,

Campbell Clinic will be offering complimentary athletic physicals to incoming-9th thru rising 12th grade Bartlett High School/Bartlett Academy student-athletes on the following dates:

- **June 6 or**
- **June 13**
- **8:00 AM – 11:00 AM**

Location:

**Germantown Clinic
1400 S. Germantown Rd**

These physicals are an important step in ensuring that your student is eligible to participate in athletics during the 2026–2027 school year.

Please review the attached packet and complete all required forms prior to attending. Having paperwork completed in advance will help the process run smoothly and efficiently.

We appreciate your support as we work to prepare our student-athletes for a successful year.

Sincerely,
Jim Steinbrecher
Bartlett High School

P.S. Please print on **one side** of the page only and keep the sheets in numerical order. Thank you!

2/8

**Student-Athlete Authorization
For
Disclosure of Protected Health Information**

I hereby authorize the physicians, athletic trainers, physical therapists and sports medicine personnel representing Campbell Clinic to disclose protected health information regarding any injury or illness affecting the student-athlete's training for and participation in athletics at Bartlett High School. Campbell Clinic is authorized to disclose this protected health information to any coach, the athletic director, or any school official in connection with his/her participation in interscholastic sports. This protected health information may concern the student-athlete's medical status, injuries, prognosis, diagnosis, athletic participation status, and related personally identifiable health information. This protected health information may be disclosed to other health care providers within the Campbell Clinic system; to Bartlett High School Administrators; and to officials of the Tennessee Secondary School Athletic Association.

I, _____, parent or guardian of _____,
(name of parent/guardian) (name of student)

understand that parent/legal guardian authorization/consent for the disclosure of the student-athlete's protected health information is a condition for participation as an interscholastic athlete at High School and for care during interscholastic athletics. I understand that my child's protected health information is protected by the federal regulations under either the Health Information Portability and Accountability Act (HIPAA) or the Family Educational Rights and Privacy Act of 1974 (the Buckley Amendment). This protected health information may not be disclosed without parent/legal guardian authorization under HIPAA or consent under the Buckley Amendment. I, the parent/legal guardian, understand that once information is disclosed per authorization or consent, the information is subject to re-disclosure and may no longer be protected by HIPAA and/or the Buckley Amendment. I, the parent/legal guardian, understand that I may revoke this authorization/consent at any time by notifying in writing Campbell Clinic. If authorization or consent is revoked, it will not have any effect on the actions Campbell Clinic personnel took in reliance on this authorization/consent prior to receiving the revocation. This authorization/consent is enacted on the date of signature and expires on May 31, 2027. Campbell Clinic will not condition your treatment on the signing of an authorization, except for any possible research-related treatment.

TMA/TSSAA PREPARTICIPATION MEDICAL EVALUATION FORM

Name	Sex	Age	DOB
Grade in 26-27 Bartlett High School		Sport(s)	
School			

Personal Physician	Address	Telephone
Have you every had a preparticipation physical before? ___ Yes ___ No If yes, when/where _____		

Please explain "Yes" answers below.

	YY	No
1. Have you ever been hospitalized? Have you ever had surgery?	_____	_____
2. Are you presently taking any medications or pills?	_____	_____
3. Do you have allergies (medicine, bees or other stinging insects)?	_____	_____
4. Have you ever passed out during exercise? Have you ever been dizzy during or after exercise? Have you ever had chest pain/discomfort during exercise? Have you had excessive, unexpected or unexplained shortness of breath during exercise? Do you tire more quickly than your friends during exercise? Have you ever had high blood pressure? Have you ever been told that you have a heart murmur? Has anyone in your family died of heart problems or a sudden death before the age of 50? Has anyone in your family developed a disability from heart disease before the age of 50?	_____	_____
5. Do you have any skin problems (itching, rashes, acne)?	_____	_____
6. Have you ever had a head injury? Have you ever been knocked unconscious? Have you ever had a seizure? Have you ever had a stinger, burner or pinched nerve?	_____	_____
7. Have you ever had heat or muscle cramps? Have you ever been dizzy or passed out in the heat?	_____	_____
8. Do you have trouble breathing or do you cough during or after activities?	_____	_____
9. Do you use any special equipment (pads, braces, neck role, mouth guard, eye guard)?	_____	_____
10. Have you had any problems with your eyes or vision? Do you wear glasses or contacts or protective eye wear?	_____	_____
11. Have you ever sprained/strained, dislocated, fractured, broken or had repeated swelling of any bones or joints? _____ Head _____ Shoulder _____ Thigh _____ Neck _____ Elbow _____ Knee _____ Chest _____ Forearm _____ Shin/Calf _____ Foot _____ Back _____ Wrist _____ Ankle _____ Hip _____ Hand	_____	_____
12. Have you ever had any other medical problem (infectious mononucleosis, diabetes)?	_____	_____
13. Have you ever had a medical problem since your last evaluation?	_____	_____
14. Have you lost/gained more than 15 lbs over the last 6 months?	_____	_____
15. When was your last tetanus shot? When was your last measles shot?	_____	_____
16. When was your first menstrual period? When was your last menstrual period? When was the longest time between your periods last year?	_____	_____

Please explain "yes" answers here:

I hereby state that, to the best of my knowledge, my answers to the above questions are correct, and with my signature give Campbell Clinic permission to perform pre-participation physical on my child.

EMERGENCY TREATMENT

To All Parents:

Since the malpractice question has come to the forefront, many hospitals and doctors will not treat a child without parent's consent (unless a matter of life or death). It is requested that you complete the information below so that if your child requires a visit to the hospital while under the supervision of the school or it's representative, this will allow the hospital to treat the injury.

IV. To Parent/Guardian—Physical Examination Limitation

5/8

The physicians of Campbell Clinic would like to inform you that this athletic physical examination is intended only as a screening exam. It is the standard physical examination that is required by the Tennessee Secondary Athletic Association for participation in high school athletics. It is not intended to replace standard medical care by your family physician. The exam of the heart and lungs is performed by the use of auscultation only (stethoscope).

Cardiac conditions that result in “sudden cardiac death” are very infrequent—1 in 135,000 (male) and 1 in 750,000 (female) . However, most of these cardiac conditions in athletes can not be identified solely by the use of a stethoscope. Specialist care that goes beyond this standard physical examination is available in the Memphis medical community. The Campbell Clinic Sports Medicine Team will be glad to help refer your child to a Cardiology specialist at your request.

Parent/Guardian: Please initial one or both of the following statements and sign below. Your initials and signature are required for completion of the physical examination.

- I understand the limitations of the standard pre-participation exam and wish for my child to proceed with this examination.
- I would like a formal echocardiogram and cardiac stress test to be arranged with a cardiologist at my expense for a more in depth cardiac examination.

SPORTS MEDICINE Campbell Clinic Concussion Policy for High School Athletes

Concussion is a complex pathophysiological process affecting the brain, induced by traumatic biomechanical forces. Several common characteristics:

- | | |
|----------------------|----------------------------------|
| Headache | Loss of consciousness or amnesia |
| Cognitive impairment | Sleep disturbances- tired |
| Emotional lability | Sensitive to light and sound |
| Dizziness | Nausea |
| Blurred vision | |

New guidelines and best practice suggestions were discussed in Zurich in 2012, and many organizations including the NCAA and TSSAA have developed some new policies in reaction to the Zurich conference. Some important conclusions included that there should be no same day return to play with the diagnosis of concussion and that treatment of athletes <18 should be more conservative than that of adult athletes.

Ideally, neuropsychological testing (ie. Impact, SCAT2) plays an important role in concussion management; however at the high school level most schools do not have access to this type of testing.

The TSSAA has developed a policy for officials mandating that they remove any player exhibiting signs of concussion from play. That player cannot return to play the same day unless they are evaluated by a physician who must fill out and sign a "TSSAA Concussion Return to Play" form.

Our policy:

1. No same day return to play with the diagnosis of concussion.
2. Every athlete experiencing a concussion needs to be evaluated by a member of the sports medicine team as soon as possible. (ATC or physician if available)
3. Appropriate same day management should then be determined. (assess the need to go to the ER, handout with signs to look out for)
4. There may be a time of rest necessary before return to activity that can include both physical and mental rest.
5. Once asymptomatic a decision should then be made among the sports medicine team when the athlete can begin the graduated return to play protocol below. (Preferably there would be 24 hours between each step)
 - a) No activity until asymptomatic.
 - b) Low impact activity x 10 mins; Rest 20 mins; Repeat if asymptomatic Aerobic activity: 1 40 yd sprint followed by 10 jumping jacks / squats / situps / pushups; Rest 30 mins; Repeat if asymptomatic. Allowed to participate in lifting exercises w/ team.
 - c) Sport- Specific Non-Contact drills: Running through plays / agility bag work etc
 - d) Full Contact drills: ie. Sled blocking, pad blocking / tackling, one-on-one drills
 - e) Return to game/play.
6. Every athlete diagnosed with a concussion must be evaluated by a physician or neuropsychologist before beginning the graduated return to play protocol.

I, _____, parent/legal guardian of _____, have received and understand the signs/symptoms and return to play guidelines as stated in the Campbell Clinic Concussion Policy.

Athlete/Parent/Guardian Sudden Cardiac Arrest Symptoms and Warning Signs Information Sheet and Acknowledgement of Receipt and Review Form

7/8

What is sudden cardiac arrest?

Sudden cardiac arrest (SCA) is when the heart stops beating, suddenly and unexpectedly. When this happens, blood stops flowing to the brain and other vital organs. SCA doesn't just happen to adults; it takes the lives of students, too. However, the causes of sudden cardiac arrest in students and adults can be different. A youth athlete's SCA will likely result from an inherited condition, while an adult's SCA may be caused by either inherited or lifestyle issues. SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

How common is sudden cardiac arrest in the United States? SCA is the #1 cause of death for adults in this country. There are about 300,000 cardiac arrests outside hospitals each year. About 2,000 patients under 25 die of SCA each year. It is the #1 cause of death for student athletes.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

- fainting or seizures during exercise;
- unexplained shortness of breath;
- dizziness;
- extreme fatigue;
- chest pains; or
- racing heart.

These symptoms can be unclear in athletes, since people often confuse these warning signs with physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

What are the risks of practicing or playing after experiencing these symptoms?

There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who experience SCA die from it.

Public Chapter 325 – the Sudden Cardiac Arrest Prevention Act

The act is intended to keep youth athletes safe while practicing or playing. The requirements of the act are:

- All youth athletes and their parents or guardians must read and sign this form. It must be returned to the school before participation in any athletic activity. A new form must be signed and returned each school year.
- The immediate removal of any youth athlete who passes out or faints while participating in an athletic activity, or who exhibits any of the following symptoms:
 - (i) Unexplained shortness of breath;
 - (ii) Chest pains
 - (iii) Dizziness
 - (iv) Racing heart rate
 - (v) Extreme fatigue
- Establish as policy that a youth athlete who has been removed from play shall not return to the practice or competition during which the youth athlete experienced symptoms consistent with sudden cardiac arrest
- Before returning to practice or play in an athletic activity, the athlete must be evaluated by a Tennessee licensed medical doctor or an osteopathic physician. Clearance to full or graduated return to practice or play must be in writing.

I have reviewed and understand the symptoms and warning signs of SCA.
